The ZOOMS STEM Design Challenge offers students a chance to develop a solution to a ‘real’ problem faced by zookeepers and staff at the Minnesota Zoo. For designing an enrichment, to building a model of a renovated animal exhibit, the problem will challenge students to use science, math, creativity, engineering, design and research skills to come up with and present a solution. Selected projects will be invited to showcase their work in the ZOOMS Design Exhibition in March at the Minnesota Zoo! **Open to students in grades 3-8. Hurry, registration is limited to 12 participants.**

Contact Emily with questions about the club at [emilym@fsmn.org](mailto:emilym@fsmn.org). **Please submit your completed registration to Hilary or Travis in the Front Office by October 4.**
